

ART DECO ARCHITECTURE &
LIVE MUSIC VENUE RETROSPECTIVE

NO VACANCY LOUNGE

No Vacancy Lounge is a contemporary Art Deco-inspired bar and performance venue designed by Jessey Zepeda and Billy Vinton. Built for social energy and immersive entertainment, it blends timeless design with modern technical ambition. Its world-class cocktail program was developed by James Beard Award-winning chefs, earning the venue 2018 Bar of the Year and acclaim as “the most ambitious club experience the Rose City had seen in years.”

The space functions as a full-service event venue, anchored by a 57-foot theatrical lighting grid delivering 280 amps of distributed power. Over 10,000 individually addressable LEDs and a robust moving-light package allow the room to transform seamlessly from lounge to spectacle. The venue features an EAW Avalon DC2 sound system powered by 300 amps of Crown amplification, delivering clarity, impact, and physical presence without sacrificing balance.

Design details define the experience. Custom fabrication techniques bring Art Deco language into the present – woven wire textures, laser-cut patterns, transparent powder coats, and period-accurate finishes throughout. Several architectural elements, including recreated 1930s-era light sconces, were custom-built to preserve the integrity of the era.

No Vacancy offers a private membership designed for its most dedicated patrons. Members receive personal liquor lockers, VIP balcony access overlooking the main floor, and fast-access hospitality for peak-hour entry and service – adding exclusivity without compromising the venue’s public energy.

The result was a venue that felt both cinematic and precise: a modern room with old-world discipline, engineered for atmosphere, sound, and unforgettable nights.
